WORK EXPERIENCE

Emiracle (IT consulting)

Software Engineer

Pakistan, Islamabad (On Site)

09/2024 - PRESENT

- Customized and optimized **Odoo eCommerce** and sales modules, improving website load time by 30% and enhancing mobile experience across product pages.
- Integrated multiple payment gateways (including **Ziina API**) in Odoo and Laravel systems, streamlining checkout flows and reducing cart abandonment.
- Developed full-featured admin dashboards and REST APIs using **Laravel**, enabling real-time content and user management with a 20% operational boost.
- Built scalable backend systems with **Node.js and Express**, powering LMS and booking platforms while ensuring 99.9% API uptime.
- Engineered responsive and dynamic frontend interfaces using **React.js**, **React-Bootstrap**, and **jQuery**, decreasing UI bugs by 35%.
- Designed and deployed **custom WordPress plugins** (e.g., FedEx shipping integration), automating post-purchase processes and improving UX for WooCommerce stores.
- Created and customized **WordPress themes** with PHP, jQuery, and Advanced Custom Fields (ACF), reducing development time by 40% on multiple client projects.
- Refactored legacy codebases in PHP and jQuery across Laravel and WP projects, reducing technical debt by 25% in under six months.
- Implemented CI/CD pipelines and version control workflows with Git across Laravel, Node.js, and WP environments, minimizing deployment failures.
- Resolved 70+ critical bugs across frontend and backend systems, ensuring a seamless user experience even during peak traffic.
- Actively learning **AI, ethical hacking**, and expanding expertise in **MERN stack** to align with modern software demands.

Tech Skills: Odoo, WordPress, Laravel, Node.js, Express, MySQL, React.js, JavaScript, jQuery, REST APIs, WooCommerce, ACF, HTML/CSS, Git, Postman, Firebase, React Bootstrap

TECHNOLOGIES

Frontend: React, TypeScript,

JavaScript, HTML, CSS, SCSS

Backend: Custom PHP, Laravel,

CodeIgniter, Symfony, Node.js,

Express.js, Fastify, REST APIs

Databases: MongoDB,

PostgreSQL, MySQL, Firebase

realtime database

DevOps & Tools: Docker, Linux,

AWS, Git

Testing: Jest, Mocha, Cypress,

React Testing Library, TDD

EDUCATION

BS in Information Technology

(PMAS Arid Agriculture University,

Rawalpindi)

Graduated 2018

CCNA Training Certificate

stability and performance improvements.

- Currently leading back-end development for **Realtor Portal**, a modern Laravel-based real estate application, focusing on modular architecture, RESTful APIs, and high code quality.
- Utilized **Docker** and **EC2** for efficient local development and cloud deployments, while incorporating **RabbitMQ** for asynchronous task processing and better scalability.
- Gained experience in **Symfony** through component-level usage and microservice design patterns, strengthening understanding of reusable and decoupled architecture.

Tech Skills: Laravel, Symfony, PHP (Custom), Amazon EC2, Docker, RabbitMQ, MySQL, RESTful APIs, Git, Nginx, Linux (Ubuntu), Composer, Postman, MVC Architecture, OOP, API Integration

SOFT SKILLS

Communication, Agile Collaboration, Mentoring, Problem-Solving, Critical Thinking, Time Management

INTERESTS

System Design, Artificial Intelligence, Weight Lifting, Calisthenics, Boxing, Wrestling, Kickboxing, Swimming, Traveling

Essentia Technologies (IT consulting)

Junior Developer

Pakistan, Islamabad

06/2020 - 06/2022

- Collaborating within a cross-functional team of **12 developers**, ensuring seamless communication and agile delivery across sprints.
- Contributing to the core development of **MiSentinel**, a security workforce management product used by enterprise clients.
- Building and maintaining backend modules using the **CodeIgniter** PHP framework, following MVC patterns and clean code practices.
- Developing dynamic and responsive user interfaces with **React.js**, improving UX and component reusability across the platform.

Tech Skills: CodeIgniter, React.js, PHP, JavaScript, HTML5, CSS3, REST APIs, Git, Agile/Scrum, MVC Architecture, Jira, MySQL

Aiwatech (IT consulting)

Junior Developer

Pakistan, Islamabad

2019 - 2020

- Developed robust and scalable websites using **PHP 7** and **WordPress**, focusing on performance, security, and user-friendly interfaces.
- Successfully delivered **10+ full-cycle web projects**, ensuring timely delivery, client satisfaction, and maintainable codebases.
- Designed and built multiple native **Android applications using Java**, with a focus on clean UI, API integration, and smooth user experience.

Tech Skills: PHP 7, WordPress, Java, Android SDK, MySQL, cPanel, HTML5, CSS3, JavaScript, REST APIs, Git, ACF, WP Plugins, Responsive Design

PROJECTS

Educational Project (LMS Platform) (2025–Present). Fullstack Developer, React, Node.js, Express, MySQL, Firebase, REST APIs.

Realtor Portal (Real Estate Platform – Schell Brothers) (2022–Present). Backend Developer, Laravel, PHP, MySQL, jQuery, REST APIs.

Heartbeat (Legacy Real Estate System – Schell Brothers) (2023–Present). Backend Developer, PHP, MySQL, jQuery.

MiSentinel (Security Workforce Platform) (2021). Fullstack Developer, CodeIgniter, React.js, PHP, MySQL.

iWork (Home Services Marketplace) (2019). Fullstack Developer, Ionic, CodeIgniter, PHP, MySQL.

CodeRanks (Learning Platform) (2018). Backend Developer, CodeIgniter, PHP.
